# Pricing Philosophy

---

We're not selling software. We're selling a done-for-you AI operations build that replaces 3–4 different tools and agencies. The structure uses a **setup fee + monthly recurring** model:

- The **setup fee** covers the 2-week custom build — qualifies serious buyers and generates immediate cash flow
- The **monthly recurring** covers the platform, AI, and ongoing support — builds predictable, compounding revenue
- **Add-ons** expand ARPU without requiring a tier upgrade — upsell opportunities at every strategy call

**Together they create high LTV with strong unit economics: 83–86% gross margin per client.**

# Tier 1: Starter

Owner-operators and small teams (1–3 staff) who are drowning in admin and missing calls.

| Component            | Price                 |
|----------------------|-----------------------|
| Setup Fee (one-time) | \$2,500               |
| Monthly Recurring    | \$699/mo              |
| Annual (10% off)     | \$7,549/yr (\$629/mo) |

## What's Included:

- AI Voice Agent (Ava) — inbound call answering, lead qualification, booking (200 mins/mo)
- Basic CRM — customer records, job history, notes
- Automated quote follow-up — 5-email nurture sequence
